Sustainable Business Practices		
Course	Description	Prerequisites
BUS-3302 Co-operative and Credit Union Accounting and Performance Measures	Examines the strategies that co-operative firms have adopted to measure social, cultural and environmental contributions to their communities and how these measurements assist co-operatives in developing sustainable business practices. There is a review of co-operative and credit union accounting and performance measurement for sustainable communities.	
BUS-3510 Supply Chain Management	Sustainable supply chains. Topics include closed loop supply chains, reverse logistics, EPR and other environmental and social implications of supply chains
